Software Engineering
Backend Development
Docker

Certifications

Certified Digital Marketing Associate
Data Analysis Using Python
Data Visualisation in Tableau
Data Analytics Essentials

Sree Charan Addala

Financial Data Analyst | SQL, Python, Financial Modelling, Power BI | Turning Data into Actionable Business Insights | Helping Organizations Make Data-Driven Decisions | Transforming Numbers into Strategic Insights

Toronto, Ontario, Canada

Summary

I'm a software engineer with a backend-first mindset. I enjoy building systems that are simple, reliable, and scalable. I care about clean code, clear logic, and solving real problems. My background spans both business and engineering, which helps me think beyond just writing code and focus on impact.

I started my career in sales and marketing at Instrukart. That role put me close to customers, data, and business operations. It showed me how much technology drives growth and efficiency. That curiosity pushed me toward software engineering. I later worked as an Associate Software Engineer, building and improving enterprise applications. I worked on backend logic, APIs, debugging, testing, and automation. I used Python, SQL, Docker, and CI/CD pipelines. I worked in agile teams and learned how to ship stable, maintainable software. Along the way, I completed an MBA, which strengthened my ability to connect technical decisions to business outcomes.

Now, I'm looking for backend or full-stack engineering roles. I want to work on meaningful systems and learn from strong engineering teams. I enjoy roles where ownership, curiosity, and execution matter. If you're building scalable products and value thoughtful engineering, I'd love to connect.

Experience

CGS (Computer Generated Solutions)

2 years

Associate Software Engineer

June 2022 - November 2023 (1 year 6 months)

Hyderabad, Telangana, India

- Developed ERP modules using C#, WPF, and SQL, enabling enterprise-scale merchandise planning and analytics.
- Built reusable C# libraries and shared business logic, reducing development effort by ~20% across teams.
- Optimized complex SQL queries and stored procedures, improving query performance by up to 30%.
- Implemented structured error handling, logging, and CI/CD pipelines in Azure DevOps, reducing issue resolution time by ~35% and accelerating releases by ~25%.
- Integrated Dynamics 365 with external systems using APIs and Azure Integration Services, enabling real-time, event-driven workflows.

Software Trainee

December 2021 - May 2022 (6 months)

Hyderabad, Telangana, India

- Customized WPF UI components using DevExpress, improving usability and consistency across ERP modules.
- Implemented centralized error handling and logging frameworks, reducing post-deployment debugging time by ~30%.
- Developed Power BI dashboards by integrating operational data sources, reducing manual reporting by ~40%.
- Optimized SQL queries and database schemas, improving data retrieval performance by ~35%.

Instrukart Holdings

Sales Analyst

March 2020 - June 2021 (1 year 4 months)

Hyderabad, Telangana, India

- Optimized product catalogues and listings on Amazon Marketplace, increasing conversion rates by up to 25%.
- Analyzed sales and campaign performance data, contributing to 10–15% month-over-month revenue growth.
- Automated listing and operational processes, reducing manual effort by ~30%.
- Conducted competitor and market research, supporting the successful launch of 10+ new SKUs.

Education

University Canada West

Master of Business Administration - MBA, Business Administration,
Management and Operations · (January 2024 - June 2025)

Indian Institute of Technology, Madras

Advanced Certification in Data Science and AI, Artificial Intelligence · (October
2021 - September 2022)

Gitam University, Hyderabad

Bachelor of Technology - BTech, Computer Science · (June 2016 - June 2020)
